

Pilbara Ports strives to perform all its functions sustainably by aligning our approach with the United Nations Sustainable Development Goals (SDGs).

Pilbara Ports approach to sustainability is founded on four key pillars, under which our people should:

1. People and Culture

Ensure that all people can fulfil their potential with dignity and equality and in a healthy environment.

2. Resilience and Prosperity

Ensure that all people can enjoy prosperous and fulfilling lives and that economic, social and technological progress occurs through the inclusion of sustainability considerations into all aspects of its decision-making processes and port operations.

3. Partnerships

Mobilise the means required to implement this Policy through partnerships for sustainable development, based on a spirit of strengthened solidarity, focussed on the needs of our communities with the participation of all stakeholders and all people.

4. Planet

Protect the planet from degradation through sustainable consumption and production, manage its natural resources sustainably and take action on climate change consistent with the WA Government’s Climate Policy.

This approach is reflected in Pilbara Ports’ sustainability strategy and framework and our strategic business planning.

This Policy applies to the Pilbara Ports Board and all Pilbara Ports employees and people engaged by, and subject to, the direction of Pilbara Ports.

The Chief Executive Officer has overall responsibility for the implementation of this Policy.

Samuel McSkimming

CHIEF EXECUTIVE OFFICER

Brad Geatches

CHAIR
